

Ahmed Ramadan Mohamed

Senior Java Backend Engineer

Cairo, Egypt | +20 100 884 0571 | ahmedramadansmaha@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Senior Java Backend Engineer and Oracle Certified Professional (Java SE 17) with 8+ years of software engineering experience, including 6 years building FinTech, payment, and telecom platforms with Java and Spring Boot. At Vodafone Egypt, build and enhance 6+ microservices across digital donation, QR payments, and Vodafone Shop integration for Vodafone Cash, a business-critical platform serving approximately 25 million users. Deliver Java 17/Spring Boot services, Kafka-based event-driven flows, Redis caching, Spring Cloud routing and configuration, secure APIs, and enterprise integrations. Combine backend engineering with former Oracle DBA expertise in SQL/PLSQL tuning, production incident root-cause analysis, code review, and CI/CD delivery across Docker, Kubernetes, AWS, and Azure.

SKILLS

Languages: Java 8/17, SQL, PL/SQL, Kotlin, Python, C#, Ruby

Backend & Frameworks: Spring Boot 3.x, Spring Framework, Spring MVC, Spring Data JPA, Hibernate, Spring Security, Spring Cloud Gateway, Spring Cloud Config Server, Spring Batch, Spring Integration, Apache Camel

Architecture & Design: Microservices, Event-Driven Architecture, Distributed Systems, RESTful API Design, System Design, Enterprise Integration, Design Patterns, SOLID, Clean Code

Messaging & Caching: Apache Kafka, RabbitMQ, Redis

Databases: Oracle Database 19c, Oracle SQL/PLSQL, PostgreSQL, MySQL, NoSQL, Query Optimization, Database Design, Flyway, RMAN

Security & IAM: Spring Security, Keycloak, JWT, OAuth 2.0, RBAC, Authentication, Authorization, Secure API Development

Cloud & DevOps: Docker, Kubernetes, AWS, Azure, Jenkins, GitHub Actions, CI/CD, Git/GitHub, Maven, Gradle, Linux

Observability: Micrometer, Prometheus, Grafana, ELK Stack, OpenTelemetry

Testing & Quality: JUnit, Mockito, Testcontainers, Integration Testing, TDD, JMeter, SonarQube

API & Delivery: Swagger/OpenAPI, Postman, GitHub Copilot, Agile/Scrum, Jira, Code Review, Root Cause Analysis, Production Troubleshooting

EXPERIENCE

Vodafone Egypt | Senior Java Software Engineer | Sep 2024 - Present | Smart Village, Egypt

- Build and enhance 6+ microservices across digital donation, QR-code payments, and Vodafone Shop integration for Vodafone Cash, a business-critical platform serving approximately 25 million users, from technical design through production release.
- Build Kafka-based event-driven flows and enterprise integrations with Siebel CRM, Oracle Database, Vodafone Shop, and internal platforms using Apache Camel.
- Implement API routing with Spring Cloud Gateway, centralized configuration with Spring Cloud Config Server, and Redis caching for fast data access across services.
- Secure transaction and customer-journey flows with Spring Security, JWT, RBAC, request validation, authorization, and consistent exception handling.
- Develop persistence components with Spring Data JPA and Hibernate, and tune Oracle SQL and PL/SQL queries for performance and reliability.
- Investigate production incidents and resolve root causes across distributed services, Kafka flows, integrations, and database components.
- Write unit and integration tests with JUnit and Mockito, review pull requests, support teammates, and ship changes through CI/CD to AWS and Azure with DevOps teams.

Core technologies: Java 17, Spring Boot, Microservices, Kafka, Spring Cloud Gateway, Config Server, Redis, Spring Security, JWT/RBAC, JPA/Hibernate, Oracle SQL/PLSQL, Apache Camel, Docker, Jenkins, CI/CD, AWS, Azure

M.T.S IT | Java Software Engineer | Jan 2021 - Aug 2024 | Egypt

- Promoted from Oracle Database Administrator to Java Software Engineer, combining backend development with deep database expertise across financial and telecom applications.
- Developed Java and Spring Boot backend services and microservices for Network Inventory and Work-Order Management systems supporting financial transaction workflows and telecom operations.
- Built REST APIs and Oracle ADF integrations for workflow automation, inventory tracking, reporting, and business operations.
- Implemented authentication, authorization, request validation, and application security with Spring Security.
- Designed and optimized Oracle objects, stored procedures, packages, triggers, and complex SQL/PLSQL queries.
- Developed unit and integration tests with JUnit and Mockito, contributed to Docker/Maven/Git CI/CD workflows, and supported production releases and troubleshooting.

Core technologies: Java 8, Spring Boot, Microservices, REST APIs, Spring Security, Oracle Database, SQL/PLSQL, Oracle ADF, JUnit, Mockito, Docker, Maven, Git, CI/CD

M.T.S IT | Oracle Database Administrator | Jan 2020 - Dec 2020 | Cairo, Egypt

- Administered Oracle Database 19c across development, testing, and production, including installation, configuration, patching, upgrades, monitoring, and production support.
- Tuned SQL and PL/SQL workloads using execution-plan analysis, indexing, statistics review, and schema optimization to improve performance and reliability.
- Implemented backup and recovery with Oracle RMAN and managed users, roles, privileges, tablespaces, data files, schema permissions, and database security.
- Supported data migrations, production releases, and incidents, performing root-cause analysis across database, storage, connectivity, and integration layers.

Core technologies: Oracle Database 19c, Oracle SQL, PL/SQL, RMAN, SQL Performance Tuning, Backup and Recovery, Database Security, Data Migration, Production Support

Integrated Solutions | C# / ASP.NET Core Developer | Mar 2018 - Nov 2019

- Built and supported an electronic invoicing product using C# and ASP.NET Core, including backend modules and REST APIs for invoice processing, reporting, data management, and workflow automation.
- Helped modernize a legacy Windows Forms application into a web-based ASP.NET Core solution through implementation, migration, and production delivery.
- Implemented authentication, authorization, and data access with Entity Framework Core.
- Supported migration from SQL Server to Oracle Database 18c, including schema conversion, data migration, PL/SQL development, query optimization, CI/CD, IIS deployment, and production troubleshooting.

Core technologies: C#, ASP.NET Core, REST APIs, Entity Framework Core, Windows Forms, SQL Server, Oracle Database 18c, T-SQL, PL/SQL, Git, IIS, CI/CD

PROJECTS

DevQA - Project Brain | IntelliJ IDEA Plugin | Sep 2026 - Present | [GitHub](#)

Kotlin, IntelliJ Platform SDK, PSI APIs, Gradle, Swing, Java, Spring Boot, Static Analysis, Software Architecture, Repository Analysis

Kotlin-based IntelliJ IDEA plugin that analyzes Spring Boot repositories, classifies components, and renders an interactive in-IDE architecture dashboard. Packaged for future distribution through the JetBrains Marketplace.

E-commerce Platform | Jul 2024 - Feb 2026 | [Review Code](#)

Spring Boot, PostgreSQL, Redis, Docker, Kubernetes, Micrometer, Prometheus, Grafana, ELK Stack, OpenTelemetry, Angular

Built a secure full-stack e-commerce platform with optimized backend flows, Redis caching, containerized Kubernetes deployment, application metrics, monitoring dashboards, distributed tracing, and centralized logging.

Human Resources Management System | May 2023 - Nov 2023 | [Review Code](#)

Spring Boot, Spring Security, PostgreSQL, REST APIs

Developed a secure Spring Boot HR backend with REST APIs and PostgreSQL persistence for recruitment, employee, and workforce-reference workflows.

EDUCATION

Master of Computer Applications (MCA), Computer Science | Jul 2022 - Jan 2027

Arab Academy for Science, Technology and Maritime Transport (AASTMT)

Bachelor of Science in Computer Science | 2019

Arab Academy for Science, Technology and Maritime Transport (AASTMT)

CERTIFICATIONS & TRAINING

- Oracle Certified Professional: Java SE 17 Developer - Oracle
- Oracle Certified Associate, Java SE 8 Programmer - Oracle
- Oracle SQL and PL/SQL Developer Fundamentals - Oracle
- Oracle Forms and Reports Developer - Oracle
- Java Collections - LinkedIn Learning
- Java Programming - HackerRank
- Software Development Life Cycle (SDLC) - Udemy
